SUMMARY

Recent Master's graduate in Digital Business & Data with hands-on experience supporting Supply Chain Operations and Analytics at Nike EMEA. Experienced transforming data into actionable business insights, managing stakeholder relationships, improving operational processes, and supporting supply chain decision-making through analytics. Strong communicator with advanced Excel, Tableau, SQL, and Databricks skills.

WORK EXPERIENCE

Nike, EMEA Hilversum – Fulltime
Supply Chain Analytics Intern

February – August 2026

- Partnered with supply chain stakeholders to **provide analytical support for operational decision-making** across EMEA.
- **Queried and analysed orderbook data in Databricks** to support ad hoc business requests to inform operational and strategic decisions
- **Built reporting solutions in Tableau and Databricks**, enabling teams to proactively identify risks, opportunities, and operational bottlenecks.
- **Developed dashboards in Tableau** that improved monitoring of business KPIs and asset performance, supporting governance and process improvement initiatives.
- **Developed & piloted AI-enabled analytical tools** to improve self-service access to supply chain insights using Databricks Genie.
- **Worked cross-functionally** with business and technical stakeholders to gather requirements, communicate findings, and drive adoption of new solutions.

L'Oréal Benelux, Hoofddorp – Fulltime
Data & CRM Assistant

March - September 2024

- Analysed customer and operational data to provide actionable business recommendations to commercial stakeholders.
- Set up backend of **automated personalisation** CRM email campaign with **A/B testing**, optimising customer communication.
- Organised a client information gathering campaign that yielded **over 500 sign-ups and over 300 WhatsApp opt-ins** by using an automated client locator to streamline data collection.
- Streamlined internal communications by setting up **automated email distribution** for 110+ employees, increasing team efficiency.
- **Automated Excel spreadsheets** using VBA macros, reducing a manual task from **50 clicks to 5**, saving 2 hours per week and reducing human error.
- Utilised **Power BI** and **Looker Studio** dashboards to identify issues and **report insights**.
- Utilised **SQL** for **segmentation** and **GDPR compliance** checks.
- Collaborated effectively in **Agile corporate environment** utilizing SCRUM methodology for **cross-functional project** delivery in fast-paced settings.

Friendship, Amsterdam – Part time
Sales & Client hospitality

2022 - 2024

- Delivered engaging tours and **presentations** in high-pressure, client-facing settings
